STATE OF RHODE ISLAND AND PROVIDENCE PLANTATIONS

DIVISION OF AIR AND HAZARDOUS MATERIALS  
291 Promenade Street  
Providence, R.I. 02908-5767

25 February 1991

Russell Fish  
Remedial Project Manager  
U.S. Department of the Navy  
Northern Division  
Naval Facilities Engineering Command  
Philadelphia, PA 19112-5094

RE: Naval Construction Battalion Center (NCBC); Sites 12 and 14

Dear Mr. Fish:

The purpose of this letter is to reiterate this Department's position regarding the removal of polychlorinated biphenyls (PCBs). As previously stated, the Rhode Island Department of Environmental Management's cleanup standard is one part per million (1 PPM).

Please be advised that the Department's concurrence with the Navy's proposed start-up date of 4 March 1991 for removal action at sites 12 and 14 is contingent upon recognition of this standard and a proposal for attainment prior to project initiation.

If you have any questions, please contact Linda Wofford or me at (401) 277-2797.

Sincerely,

Warren S. Angell II, Principal Engineer  
Division of Air & Hazardous Materials
